

The background image shows a construction worker in a yellow hard hat and a high-visibility vest, talking on a mobile phone and holding a clipboard. In the background, a large white wind turbine is visible against a blue sky with some clouds.

Energy & Climate Change Policy Statement

Ogilvie Construction is committed to responsible energy management and to practicing energy efficiency throughout our operations.

Ogilvie Construction recognises that climate change is emerging as one of the most serious environmental challenges currently threatening the global community.

We understand that there is a need to minimise Greenhouse gas emissions produced as a result of fossil fuel consumption and we acknowledge that we have a role to play in tackling these issues.

However, with challenges comes opportunities and we believe that adaptation to climate change will be key to the way in which we deliver our business.

We also believe that we need to start internally – how else can we demonstrate our commitment – and we need to start with energy conservation.

The specific energy efficient practices which Ogilvie Construction is committed to at all levels within the Company are:

- ▶ To encourage energy awareness amongst employees through policy roll out, intranet communication and training
- ▶ To reduce the amount of energy consumption across our operations – both site and office based
- ▶ To monitor and reduce energy usage where adequate metering is available, initially our offices
- ▶ To produce energy saving action plans, initially for offices, and keep staff informed of progress
- ▶ To set equipment such as photocopiers, and printers which need to remain on during the day, to energy saving mode
- ▶ To switch off appliances when not in use
- ▶ To encourage energy saving initiatives from our employees

And for our Clients, Supply Chain & Stakeholders:

- ▶ To promote to clients the use of energy efficient solutions
- ▶ To encourage our Supply Chain to adopt energy efficient systems of work in their operations
- ▶ To ensure that selection & maintenance of plant and equipment is carried out with due consideration to whole life energy efficiency

We welcome the views of the public and any other interested parties with respect to our operations and will make this energy policy available to them. In addition, this policy statement will be communicated to all persons working for and on behalf of Ogilvie Construction.
